

11-15 SEPT. 2023 SUMMER SCHOOL BIODIVERSITY

Biodiversity, the variety of genes, organisms and ecosystems is the basis of life that ensures human survival. Scientists are thus challenged to propose clear, unambiguously applicable methods for the protection of biodiversity - as a basis for political decisions and societal developments.

The Summer School will introduce you to state-of-the-art knowledge and approaches regarding issues related to biodiversity, such as ecosystem services, agrobiodiversity and societal transformation.

Join an international cohort of researchers to expand your knowledge and find answers to current challenges: The program combines plenary lectures and plenty of interaction with leading scientists creating synergy around solutions and encouraging interdisciplinary collaboration. Workshops to complement your academic pursuits are included as well as leisure activities.

KEYNOTE SPEAKERS

DR. CARSTEN NEBHÖVER
Federal Environmental Agency

DR. C. SCHRÖTER-SCHLAACK
Helmholtz Center, Leipzig

PROF. DR. JOSEF SETTELE
IPBES, Helmholtz Center

WORKSHOPS

- Biodiversity protection and stakeholders - An interactive session
- Social-ecological analysis and knowledge transfer
- Graphical Abstracts Design
- Media Training

REGISTRATION

 Deadline July 15, 2023

 PhD students, Postdocs
Adv. Master Students

English level B1

NO ATTENDANCE FEE

 Vegetarian catering incl.
