## Project “facade greening”

### Contributors for facade greening at HGU wanted!

At the end of 2019, the university’s student group, which deals with the greening of facades, came together. Since then, your fellow students have been busy with the construction of suitable plants and have carried out various tests in the laboratory and greenhouse.

A few weeks ago, the main experiment started, in which planting modules were planted and set up outside on the experimental walls. Two different combinations of plants (a naschwand with vegetables and fruits) and a substrate with charcoal (produced at the HGU) and moss wool are tested. Regular monitors record how the plants develop. And here is where you come in: Students of **ALL** Study programs and semesters are welcome to join in gardening!

Is that something for you? Simply contact [ag-fassadenbegruenung@web.de](mailto:ag-fassadenbegruenung@web.de).
